### Lavandula angustifolia 'Munstead'

English Lavender

USDA Zone: 4-9

Plant number: 1.315.100

Lavender is actually a low-growing shrub, native to the Mediterranean region. The fragrant flowers and foliage make it a favourite for herb gardens and in the perennial border. Will also grow fine in tubs or containers, but in colder regions the plants may then need shelter for the winter. This reliable, compact selection has grey-green foliage and bright lavender-blue flowers. Prune lightly in early spring, no harder than 4 inches. Lavender **MUST** have good drainage in order to avoid root rot problems. Consider growing in a raised bed or rock garden. Drought tolerant once established.

#### Further details for Lavandula angustifolia 'Munstead'

##### Optimal Growing Conditions

##### Sun Exposure

Full Sun

##### Soil Type

Normal or  
Sandy

##### Soil pH

Neutral or  
Alkaline or  
Acid

##### Soil Moisture

Dry

##### Care Level

Easy

##### Appearance and Characteristics

##### Flower Colour

Deep Blue

##### Blooming Time

Early Summer  
Mid Summer  
Late Summer

##### Foliage Color

Grey Green

##### Plant Uses & Characteristics

Accent: Good Texture/Form  
Alpine & Rock  
Attracts Butterflies  
Attracts Hummingbirds
